1

WEIGH IN

Enter the yard via Stonedon Drive and report to the weighbridge (located at the far right) to weigh in.

2

DROP SAMPLE

After weighing in, drop a sample at the Sample Shed (located on the right), before proceeding to the waiting bays.

3

WAITING LINES

Join one of the 3 dedicated waiting lines (4.5m wide each) and wait for your turn.

4

DUMPING PIT (WATER)

Proceed to one of the 2 dumping bays when directed by our team.

We only take hydro excavation waste, catchpit waste and road sweepings.

5

RESOURCE RECOVERY PLANT

One truck can dump at the Resource Recovery Plant.

We only take hydro excavation waste, catchpit waste and road sweepings.

6

TREATMENT SHED

Interceptor waste, grease trap waste and other waste contaminants should be dropped at the Treatment Shed.

7

WEIGH OUT & EXIT

After tipping and disposal of waste, return to the weighbridge (same location as step 1) to weigh out, then follow the blue arrows and exit right onto Stonedon Drive. Thank you and drive safely.

Legend

- Go here first (to dump/dispose of waste)
- After tipping and disposal of waste, go to exit

Key Information

- 3 waiting bays (4.5m wide each – 3 trucks can hold)
- Dumping Pit – 10m long x 3m wide (two trucks can dump)
- Resource Recovery Plant – one truck can dump
- Follow yellow arrows first, then blue arrows to exit
